

MPOS Solutions

PAX offers a suite of MPOS products such as the D180, D200 and D210. These compact and high quality devices come with all the latest international certifications including Visa payWave and MasterCard PayPass, PCI PTS 3.x, SRED and EMV Levels 1 & 2.

Payment initiated by mobile applications on smart devices can be completed on the PAX MPOS devices via EMV smart card reader, magnetic stripe or inbuilt contactless. Multiple connectivity options include Wi-Fi, Bluetooth, GPRS and USB cable.

PAX's MPOS terminals are MFi certified for use with Apple iPad, iPhone and any Android smart device.

PAX ESTABLISHED A STRATEGIC PARTNERSHIP WITH HISENSE

One hundred thousand units of PAX's innovative D200 MPOS device will be supplied to Hisense, China's leading commercial information systems and integrated solutions provider.

PAX's D200 is now a Visa Ready and MasterCard approved MPOS terminal, packed with latest international certifications including Contactless, PCI PTS 3.x, SRED and EMV levels 1 & 2. Payment

initiated by mobile applications on smart devices can be completed on the D200 devices via EMV smart card reader, magnetic stripe or inbuilt contactless. Multiple connectivity options include WiFi, Bluetooth and USB cable.

At the formal signing ceremony in October at Shenzhen's exclusive Kempinski Hotel, Mr. Zhang Jiren, General Manager of Hisense, said: "This partnership with PAX creates a powerful alliance around product, technology and marketing". Mr. Jack Lu, CEO of PAX, added "We will be working closely with Hisense to conduct new project development, new technology research and looking at ways to expand market channels to provide customers with a one-stop service."

Market Spotlight

APPLE ISSUES MFi CERTIFICATION FOR PAX TECHNOLOGY MPOS TERMINALS

Apple has granted MFi certification for PAX's innovative portfolio of compact MPOS terminals D200, D210 which can now be used with iPhone, iPad and other mobile devices running payment applications.

CB2 CERTIFICATION FOR PAX IN ITALY

PAX Italia has obtained Italian CB2 banking certification on the S58, S80 and S90 products. The D200 MPOS is already available with NCR's winEPTS integrated ECR software.

BANRISUL LAUNCHES MOBILE PAYMENT SOLUTION WITH PAX D200 MPOS

PAX and Banrisul, a leading Brazilian Bank, announced the launching of Brazil's first mobile payment solution for the launching of Brazil's first mobile payment solution for enabled MPOS device, the D200.

Banrisul's solution integrates with the D200 wireless payment terminal which comes with a suite of certifications, including PCI 3.x, EMV, MasterCard PayPass and Visa payWave and Apple's MFi approval.

PAX COOPERATES WITH BANK MANDIRI IN INDONESIA FOR POS SOLUTIONS

PAX has secured a tender with Bank Mandiri in Indonesia to provide 10,000 units of contactless R50 readers.

The R50 complies with the latest payment standards in accordance with VISA and MasterCard, furthermore, it enhances payment experience, and customer loyalty by incorporating contactless credit card, prepaid and debit solutions.

INDIAN BUSES WILL USE PAX TERMINALS FOR ELECTRONIC TICKETING

PAX has won a large tender, through solutions provider Trimax in India to supply 10,000 mobile devices to enable electronic fare ticketing in Bangalore.

PAX's mobile S90 terminal was selected as a future proofed device offering GPRS communications, Visa payWave and Mastercard PayPass contactless, as well as the latest PCI 3.x and EMV certifications.

PAX embraces collaboration with local solution providers so that they can develop software themselves on the PAX platform.

CIELO SELECTS PAX MPOS SOLUTION

PAX offers D200 mPOS device to Cielo Mobile Solution, which is the first in Brazil's market to offer debit card and voucher payment methods, or the Credit function in up to 48 installments, in addition to regular credit or credit in up to 6 installments through the chip card reader and pin.

Autonomous professionals, small entrepreneurs and merchants may count on the easiness of the D200 Cielo chip card reader and pin, connected to the smartphone or to the tablet via Bluetooth. For the cardholder, the advantage is the peace of mind when typing the password directly in the reader D200, increasing safety perception.

PAX MPOS PORTFOLIO IS 'VISA READY'

PAX's D200 MPOS & D210 have been successfully approved in the VISA READY program.

NIGERIAN CDMA CONVERSION PROJECT

PAX Technology launched a special program half way through 2013 for Nigerian Banks to cost effectively replace GPRS modules with CDMA ones. Most of Nigeria's estimated 200,000 POS terminals offer dual-SIM GPRS functionality (in itself far superior to single-SIM or roaming-SIM offerings), yet local telco networks remain unstable, leading to massive merchant demand for CDMA enabled payment devices which offer greater network stability and less down-time.

MASTERCARD MPOS PROGRAM

PAX's D200 MPOS & D210 terminals have been successfully registered as the MPOS solution in the MasterCard Mobile Point-Of-Sale Program.

TERMINAL MANAGEMENT SYSTEM

NextGen is the name of PAX's new TMS, available to channel partners and direct customers worldwide. It supports both traditional POS products (S58, S80, S90, SP30) as well as the newer S and D-Series devices (S300, S800, S900, D200, D210). NextGen offers substantial benefits over rival TMS systems.
